

2019 EAGLES RESERVE LANDSCAPING PROJECT

Your HOA Board has approved plans and received bids from several landscape design firms to upgrade the landscaping in our community. A decision was made to retain a landscape designer associated with Westcoast Landscape and Lawns, the company that maintains our grounds.

Plans include a new design for our entrance area and a complete renovation of the pool landscaping, as well as the addition of pavers to the pool apron.

The fronts of all homes will also be upgraded. The home designs will be individually coordinated using existing plants that are cohesive with the enhanced look desired. Work on homes will be done in stages, with several buildings being done at once, beginning with the first three villas and townhomes on August 26, 2019.

In addition, Foxtail palms will replace every other Washingtonian palm along the streets.
